

## Single Patient Use Metal Fibre Optic Laryngoscopes

100% Metal Single Patient Use Fibre Optic Blade designed for single patient use which eliminates the risk of cross contamination.

### Ultra Low Profile Blade

Ultra Low Profile Macintosh design reduces the risk of dental damage, and improves visualisation of the vocal cords, even during a difficult intubation.

### Eliminate Risk of Cross-Infection

Single-use individually sterile-packed blade eliminates the risk of cross-infection between patients.

### Confidence & Control

100% metal construction matches the performance characteristics of reusable blades.

### Enhanced Vision

The encased fibre optic bundle provides bright, focused high intensity illumination.
