

WOUND CARE

HAEMOSTATIC BANDAGES

First aid and Haemostatic products developed in Japan to simplify haemostasis treatment. These adhesive bandages protect and secure punctured skin after an IV injection or catheter removal. Used for various situations such as covering a punctured site following an injection, to stop the flow of blood from an intravenous line using pressure immobilisation, and to treat bleeding of a peripheral vein.

CHUSHAVAN MEDIUM SIZE – FIRST AID ADHESIVE BANDAGE

These adhesive bandages are ideal as a protective covering after an injection. They are 27mm x 27mm adhesive size with a pad size of 13mm x 13mm with 1mm thickness.

DEF1250	Chushavan Pressure Pad Medium	Box of 60 packets – each packet contains 8 pressure pads

DEF1250

IV PRESSURE PAD

These IV Pressure pads are suitable to use following the removal of an IV, after giving an intravenous injection or after drawing blood or immunisation injections. Comprises of a 36mm round adhesive with a 16mm haemostatic pad. The 3mm thick round pad is made of highly absorbent non-woven cellulose and creates a compression effect, resulting in bleeding stopping quickly. After bleeding has stopped, remove the pressure pad slowly and carefully.

DEF929	IV Pressure Pad White	100
